

Special Event

A Michigan Alzheimer's Disease Research Center and Detroit Health Department event co-sponsored by MDHHS and our Partners through the ACCESS-ADRD Grant

This event will cover common challenges in aging, including what "normal aging" looks like as well as signs and symptoms of Mild Cognitive Impairment and Dementia. It will also cover support options to meet and overcome challenges and next steps if you are concerned about your memory and thinking abilities. Free cognitive screenings will be available for those who are interested, sign up for 30 minute screenings day of the event on a first come first serve basis.

To register
